

# The Andersons Bedding System™

## TWO PRODUCTS. ONE COMPLETE BEDDING SYSTEM.

Combining Enrich-o'Cobs® premium blended enrichment bedding and Bed-r'Nest™ portion controlled nesting material, The Andersons Bedding System provides mice with all of their husbandry needs — bedding, nesting and enrichment.

### 1 ENRICH-O'COBS

Combining our Bed-o'Cobs® 1/4" corn cob bedding and our Enrich-n'Nest™ paper twists, Enrich-o'Cobs provides mice with a source of bedding, nesting and enrichment, all in one bag.

### 2 BED-R'NEST

Made with 8 grams of virgin kraft paper, Bed-r'Nest provides mice with a source of nest building material that resembles the thin strands of grass and other substrates they instinctively use to build their nests in nature.

In providing bedding, nesting AND enrichment, The Andersons Bedding System benefits both mice and labs:

#### BENEFITS TO MICE

- Ability to build more complex nests, similar to their instinctive behaviors in the wild
- Ability to adapt the cage environment for thermoregulation
- Additional environmental control results in less abnormal behaviors
- Both Enrich-o'Cobs and Bed-r'Nest are dust free, making the system ideal for nude and hairless mice
- Eliminates the need for additional enrichment items

#### BENEFITS TO THE LAB

- With just two products providing all of the bedding, nesting and enrichment needs, it is easy to repeat the cage fill process, each and every time
- Improved dispensing efficiencies
- Simplifying the dispensing and cage fill process leaves technicians more available to focus on animal health
